

WINTERSEMESTER 2014

SUMMER SCHOOL

ISLAND OF DJERBA - TUNISIA

SEMINAR + SOMMERUNI // BSC + MSC ARCHITEKTUR UND STADTPLANUNG

THEMA

**Case study of: LELLA HADHRIA Lagoon, Island of Djerba
„Towards a Sustainable Development of the Littoral Coast in Tunisia “
- Landscape, Tourism and Integrated Coastal Management -**

The Island of Djerba is a specific example of a human community adapting to its environment and has been recognised by the UNESCO as „Patrimony of Humanity“ just recently. Since the 1960's the island has been witnessing intensive transformation due to the mass tourism development. The rapid urbanization of the littoral strip with hotel complexes, golf courses and marinas threatens the vernacular assets with a risk of loss of the island's identity. Meanwhile, the island of Djerba is in need of development, but a development in a reasoned way taking into account its specificities. The project site of Lella Hadhria, a pristine lagoon ecosystem and home to a rich fauna and flora, is threatened by development plans for a hotel complex. The attendance of different representatives and stakeholders will give us a broad un-derstanding of existing interests as well as ongoing ef-forts. With an interdisciplinary approach, bringing together architecture, urban planning, landscap-architecture and ecology professionals and students, the summer school wants to contribute to a spirit of cooperation.

The Summer School will be held in collaboration with Carthage University, Tunis (Prof. Dr. Imène Zaâfrane Zhioua) and Ain Shams University, Cairo (Prof. Dr. Mohamed Salheen). During 10 days a mixed group of 8 German, 8 Egyptian and 8 German students will develop common concepts in mutual exchange of experience and much-needed skills for the support of an integrated and sus-tainable costal development of the Tunisian touristic infrastructure.

ORGANISATION

Seminar und Sommeruniversität in Tunesien von 22.09. bis 03.10.2014

Bachelor: Seminar, Modul 23220 Stadt und Landschaft, Prüfungsnr. 23221, LP 6,0

Master: 48290 Landschaftspl. und ökosystemares Entwerfen, Prüfungsnr. 48291, LP 6,0
